IT114-450-M2024 - [IT114] Module 1 Getting Started

Submissions:

Submission Selection

1 Submission [active] 5/20/2024 3:21:12 PM

Instructions

^ COLLAPSE ^

Overview Video: https://youtu.be/LQwyAhmNzoQ

- Create a repository on github, use the format ucid-course-section as the repository name.
- 2. Make sure it's set to private
- Go to Settings -> Manage Access -> Invite Collaborator -> Search for my ID MattToegel and send
 an invite; if your section has a grader do the same for their github username (refer to course
 announcements)
 - Note: Once in a while the invite doesn't get created correctly and you'll need to resend it, keep an eye on the acceptance of the invite since this is required for further HW validations. A comment will be left on Canvas for the submission if the invite is missing at the time of grading).
- From the terminal / command line create a new branch called M1-GettingStarted
- Create a README.md file and add it to the branch
- Fill in some basic details:
 - Course/Section
 - Your name (first is fine)
 - Brief info about yourself you'd like to share
- 7. Hint after creating the file
 - git add README.md
 - git commit -m "my readme file"
 - 3. git push origin M1-GettingStarted
 - Create a pull request from this branch (via github.com)
 - Don't merge/close the pull request yet
- 8. Fill in the below deliverables.
- 9. Once finished, ensure it's saved and click the "Export" button.
- 10. Move the generated PDF into your local repository folder at any location of your choosing.

- 11. Do the following commands
 - 1. git add . (this will add all changes)
 - git commit -m "adding output file"
 - 3. git push origin M1-GettingStarted
- 12. Go back to github and merge the pull request that was opened
- 13. Go to Canvas and upload the same PDF that you just downloaded and pushed to GitHub

Note: Having the submission saved and active keeps it eligible for grading.

Branch name: M1-GettingStarted

Tasks: 4 Points: 10.00

IDE Setup Evidence (2 pts.)

Task #1 - Points: 1

Text: Required Extensions

Caption (required) 🗸

Describe/highlight what's being shown

Showing java extension is installed with black arrow

Describe/highlight what's being shown

Showing that WakaTime is installed, it shows it is calculating the time spent in the background.

Reflection (6 pts.)

Text: Talk about what you learned during this module, anything interesting, new, etc.

Should be at least a few sentences for full credit

Response:

I learned how to clone and connect my github repository using git. I also learned about public and private keys and how to link them to my github account. Also I learned how to do pull requests on github and how to add collaborators to my repository.

Task #2 - Points: 1

Text: Did you have any issues? If so, how did you resolve them? If no issues, just type "no issues"

Response:

One issue I had was getting wakatime to show up at the bottom of visual studio. I went to wakatime's website and made an account through github and then got an API key which I was able to put into vscode and get it to start working.

Task #1 - Points: 1

Text: Add the pull request link here (it should end in /pull/#)

URL #1

https://github.com/jah89/jah89-IT114-450/pull/1
